

# SYSTEM EXAMPLE 15KLD BIOSENTINEL INCLUDING AERATION, SEDIMENTATION PROCESS, FILTER MEDIA AND CHLORINE DOSING

# REMOVAL PERFORMANCE PERCENTAGES

## TYPICAL INFLUENT 30-350 BOD

| BOD, COD, NITROGEN REMOVAL                   |     |
|--|-----|
| Ensep BioSentinel Reactor Biological Process | 30% |
| Aeration Process                             | 65% |
| Media Filter                                 | 5%  |

| TSS AND PHOSPHORUS REMOVAL |        |
|----------------------------|--------|
| Sedimentation Process      | 80-90% |
| Media Filter               | 5%     |

| FECAL COLIFORM REMOVAL |  |
|------------------------|--|
| Chlorine Dosing        |  |

# REMOVAL PERFORMANCE WITH AERATION, SEDIMENTATION PROCESS AND OPTIONAL MEDIA FILTER

| INLET WATER QUALITY |         |      |
|---------------------|---------|------|
| PARAMETERS          | RANGE   | UOM  |
| pH                  | 5.5-9.0 | -    |
| BOD                 | 30-350  | mg/l |
| TSS                 | 350     | mg/l |
| COD                 | 50-650  | mg/l |
| Total Nitrogen      | 85      | mg/l |
| Total Phosphorous   | 15      | mg/l |

| DISCHARGE WATER QUALITY |           |      |
|-------------------------|-----------|------|
| PARAMETERS              | RANGE     | UOM  |
| pH                      | 5.5-9.0   | -    |
| BOD                     | <10       | mg/l |
| TSS                     | <20       | mg/l |
| COD                     | <50       | mg/l |
| Total Nitrogen          | <10       | mg/l |
| Total Phosphorous       | <1        | mg/l |
| Fecal Coliform          | 100/100ml | MPN  |

| POWER USAGE  |                                      |         |
|--|--------------------------------------|---------|
| <u>Typical power usage for Biosentinel reactor recirculation process</u> | 0.261                                | KWH/KLD |
| WAS Pump   | See 15KLD system example on slide 12 |         |
| RAS Pump   |                                      |         |
| Aeration Pump  |                                      |         |
| Transfer Pump  |                                      |         |

# TECHNICAL SPECIFICATION 15KLD SYSTEM

| PARAMETER                                    | VALUE                               |
|--|-------------------------------------|
| Design flow capacity                         | 15 KLD                              |
| Diameter of BioSentinel (FBCB) Reactor Media | 1600 mm                             |
| Height of BioSentinel (FBCB) Reactor Media   | 900 mm                              |
| Surface Area                                 | 237 m <sup>2</sup>                  |
| Hydraulic Loading Rate                       | 1.2 m <sup>2</sup> /kg BOD          |
| Bio-Reactor Volume                           | 4.5 m <sup>3</sup>                  |
| Aeration time                                | 24 hours                            |
| MLSS   | 3,000 mg/L                          |
| Air flow rate                                | 15 cum/hr.                          |
| Clarifier area                               | 2.25 m <sup>2</sup>                 |
| RAS rate                                     | 0.75 m <sup>3</sup> /hr.            |
| WAS rate                                     | 131.25 L/d                          |
| Tank Dimension                               | 4.5m x 1.8m x 2.9m +0.3m Free Board |
